It took me many years to go back to school after my associates because I was already in dept. and was unsure of my future, as I had no support. I wasn't going to attend college because I had to move out at 17 and start working. Affording bills and school wasn't an option for me until I was introduced to TEACH. This gave me what I needed to go to school even if I can't go full time.

- It is a way for me to get a degree I otherwise couldn't afford.
- It has meant a lot because financially it is hard to pay for books and I only receive loans and I know that if I continue to use loans that will become a huge burden on me.
- Thanks to TEACH I have hope for my career. I have always been curious and eager to learn but without adequate resources. I felt depressed and stuck with a low wage range of opportunity. How can the college/university be more helpful to you? (please be specific)

- It's been fine so far
- The courses were a bit confusing I definitely need to talk to an advisor.
- I am still nervous about having to travel to the North Campus.
- They can answer messages left or emails faster with more detail and information.
- It's pretty helpful
- Northeast doesn't offer enough summer classes.
- Being a Family Child Care Provider I can't leave work for the length of time needed for the practicums. Especially Administration Practicum. I wish that they didn't have to be in their facilities.
- UNK can help to walk transfer students through the process
- They are great I just hate to turn a lot of papers every year to enroll in TEACH
- More input with the teachers for online classes.
- I wish my college that I attended had early childhood staff that stayed every week for any student that need help on their homework.
- Better communication between professors and students in online courses.
- be more helpful and not so rude when someone calls and asks a question

- Understanding that people work full time and go to school.
- They are doing a good job by helping my education.
- it's hard when talking to more than one teacher and they all tell you different things
- It would be helpful if they could lay out what classes I need to take and not keep bouncing be around from UNK to Northeast.
- The classes I have taken have been good. My only concern is with this last math class I had there was too much homework to be done. I had class twice a week and a lot of homework would be given to be done for the next class. This makes it hard if you work full time and have a family at home.
- More helpful with information on student teaching
- Having online classes has been very helpful.
- By helping connect educators forming a community with the field
- To have instructors and advisors handle questions or concerns with the classes or assignments I might have a better way which they do now
- They are awesome
- By having more courses able during different times.
- My college advisors are very helpful. Can't think of anything.
- I wish they offered more classes at the Sarpy location
- They are very helpful. The only thing I can think of is answering emails in a faster manner and not listing more than 1 teacher on the syllabus because I was talking to the wrong teacher for a while until I finally figured it out by calling the 1 teachers name that I saw first.
- My college is very helpful at this time.
- I would like more access to the teachers teaching the courses I am taking.
- Letting you register for classes before the designated day so they won't be crushed.
- I don't think there's anything.
- It would be nice to have shorter evening classes from 630-8 or something like that, a couple times a week so that I had time to get there and would have time after work and school to get things done still.
- Offer more evening classes
- I am graduating a few quarters behind because some classes were not offered online when I needed them. This issue could have been addressed.
- They are helpful.
- Have more nighttime classes for early childhood.
- More responsive on emails
- Give credit for CDA and for management training courses.
- Post the syllabus a week early so we can get a jump on the reading
- I feel like they are always busy and it's hard to see my advisor at a time that is good for me. I would like to have more advisors there to help when needed.
- They are doing a great job.
- Have all classes available on campus not just online. I haven't finished degree because I scared of the online component.
- Offer more online classes can practicums be online?
- Better technology that is more user friendly
- Offer more evening classes they often get cancelled
- More teachers that are flexible in meeting with students and answering you back
- The UNK website can be very confusing at first.
- Accessibility of advisors

- Offer more online courses with a larger amount of seats available
- Provide laptops
- Registration was a bit much with certain paperwork needed that I was unaware of.

Is there anything else that you wish to share with us that have not been covered in this survey?

- Other teacher grants/scholarships to apply for I do not have to pay back
- I really do love this scholarship I always tell parents and classmates. It has helped me stay on track and makes getting a degree seem more possible.
- I wish there was strictly more online options available.
- Thank you for giving me the opportunity to go to school and do what I love.
- What happens if I do not use my 4 hours a week to study at work?
- Thank you
- If my daycare chooses to get rid of allowing us to do the bachelor program. What do I do? That was my main goal to do a transfer. Now I don't know if that will happen.
- Julie is very patient and awesome. Thank you everyone with TEACH for the opportunity.
- I think that the amount of time off that we receive should be based off the amount of classes 4 hours is good for 1 or 2 or maybe 3 classes but more classes should get more hours.
- I realize it is important to stay in the child care field after I complete my contract. I intend to keep working in Early Childhood I wish I could move into teaching at a preschool after receiving my teaching certificate.
- Within the field it is very important thing to have the right support Julie Warford has been such a blessing and supportive figure that is efficient and approaching. Thank you.
- I just wanted to thank you for providing me with this opportunity and the help I get from you.
- Thank you for everything. This scholarship is amazing and means a lot to me. I appreciate all the work you all put into making this scholarship possible.
- Thank you for this scholarship.
- Julie is very helpful.
- I'm very thankful for this program.
- I would just like to say thank you for all you do and continue to do
- What are we supposed to do if our sponsors aren't very cooperative with us?
- I think staffing and scheduling at work effect the time that is left for teachers to work on homework I found myself taking work home had to do home duties and then homework.
- Thank you
