

“WHY SPONSOR A SCHOLARSHIP?”

A quality program counts on quality teachers! One of the most significant indicators of quality child care is the educational level of child care professionals. The scholarship program allows you to assist staff in achieving their professional development goals with credit-based education.

T.E.A.C.H. has a positive impact on reducing staff turnover. Research shows that children thrive on stability in their relationships with adults during the early years. High turnover has been found to have detrimental effects on the healthy development of young children.

Sponsorship makes good business sense when you calculate the cost of turnover. Rarely do programs include in their budgets a line item reflecting the cost of turnover, but when calculated it is considerable. As evidenced in the example found in this brochure, the cost of replacing a teacher is far greater than sponsoring one on a scholarship. This is a benefit centers can offer to employees that have little to no effect on their bottom line.

Parents can come to understand and appreciate the quality of your program. By participating in the scholarship program, you can show parents your commitment to giving their children the best, with educated staff who are putting knowledge into practice. You improve the marketability of your program when it is a good place for children and a good place for teachers.
